

Raphael Arun Götz

Software Engineer · Leipzig, Germany

contact@raphael-goetz.de · raphael-goetz.de · github.com/raphael-goetz

Backend-focused software engineer specializing in distributed systems, automation platforms, and developer tooling. Experienced in designing microservice architectures, runtime systems, and event-driven infrastructure using Rust, Go, and TypeScript.

EXPERIENCE

Founder & Software Architect / CodeZero / Code0 UG

2023 - present

- Founded and built CodeZero, a no-code automation platform enabling teams to create workflow automations and backend APIs without writing code.
- Designed and implemented the runtime, Rust-first microservices, API architecture, repository ownership, and GitHub-based team workflows.

Stack: Rust, Ruby, TypeScript, Docker, gRPC, GraphQL, Tonic, Rails, NATS, Postgres

Technical Lead & Software Architect / o7 Studio OOD

2023 - present

- Planned and developed Octopus independently, an interconnected backend/CMS layer for real-time game infrastructure, service integrations, and cross-server communication.
- Worked on distributed infrastructure, Go-based proxy systems, event-driven communication, storage, service tooling, and developer-facing platform APIs.

Stack: Go, TypeScript, Java, Kotlin, Docker, gRPC, NATS, MongoDB

Dual Student / Software Developer / it factum GmbH

2023 - 2026

- Developed web applications for external clients across client and server code.
- Worked across C#/.NET backends and React/TypeScript frontends.

Stack: C#, .NET, React, TypeScript

PROJECTS

CodeZero / No-code automation platform

Rust-first

Runtime system, microservice architecture, GraphQL APIs, event-driven service communication, workflow execution, and backend endpoint generation.

Octopus / Backend/CMS platform

Go-first

Interconnected backend layer for shared game data, cross-server communication, Discord integrations, websites, and service orchestration across the o7 ecosystem.

SKILLS

Core

Rust

Go

TypeScript

Docker

Postgres

gRPC

Experienced

Ruby

Java

Kotlin

GraphQL

MongoDB

C#/.NET

Specializations

Distributed systems, microservices, API design, runtime infrastructure, event-driven architecture, backend services, CLI tools, TUIs.

Other

Docker, NATS, Postgres, MongoDB, GitHub, GitLab. OS: Windows, macOS, Linux. Languages: German L1, English C1.

EDUCATION

Bachelor's Degree, Computer Science / DHSN, Leipzig

2023 - 2026

Dual bachelor's degree program alongside professional software development.

Leipzig, June 16, 2026
